

Agriculture Equipments & Farm Implement

Seed cum Fertilizer Drill

It is used for sowing wheat, barley, peas, pulses, jawar, bajra etc at uniform rate.

It has row to row arrangement with two depth control wheels. It is operated with tractor. It is available in 7, 9, 11 & 13 tines with fertilizer box.

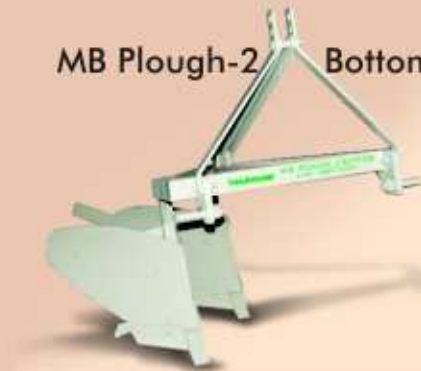

Disc Plough

Agrosaw Disc Ploughs are manufactured in steel tubes, designed to work in dry and hard soils, suitable for 3-point linkage in category I & II series operated with hydraulic control. Discs are made of high carbon steel. The plough is balanced to provide deep penetration. Rear furrow wheel is provided to prevent side

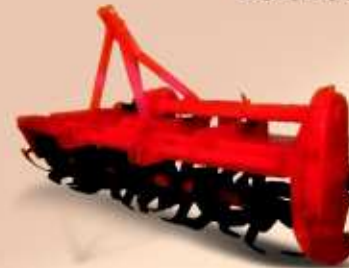

draft on the Tractor and is spring mounted. Heavy duty taper roller bearings are provided for smooth rolling of discs. Available in 2, 3 & 4 furrow resp.

MB Plough-2 Bottom

It cuts, breaks and inverts the soil for seed bed preparation during ploughing. It is available in 2 Bottom, 3 bottom. It is tractor mounted Type.

Rotavator

It is available for 540 PTO rpm & 1000 PTO rpm tractors. Standard Rotavator speed is 210 rpm. Depth is adjust with adjustable depth skids. Available in 30, 36, 42 & 48 blades.

Reversible Plough

The reversible plough is a primary tillage implement which performs the function of deep-opening and loosening of the soil. It lifts the soil-cold and throws it on the soil surface breaking the soil-cold into smaller particle size. Available in 1, 2, 3 & 4 bottom.

Offset Disc Harrow

Tractor mounted Offset Disc Harrow is a hydraulically controlled implement suitable for category 1st and 2nd hitch pins. It has a welded steel frame which is compact rigid with provision of adjustment of disc gang angle, heavy duty scrapers are provided with each disc for mud proof action.

Chisel Plough (Sub Soiler)

Specially designed for deep ploughing particularly in hard soil. This implement is very useful for yield increase, specially for Sugarcane/ Cotton/ Maize crops. As it ploughs very deep into the soil & very useful for dry farming, can be operated with 35 HP or above tractor. Available in 2 & 3 tines.

Trailed Offset Disc Harrow

Agrosaw Trailed Offset Disc Harrow is meant for big farm lands. These are suitable for high H.P. tractors. It trails behind the tractor. Because of heavy design and weight it can effectively break heavy clods. The harrow has a strong and sturdy main frame with high quality steel disc, heavy duty chilled cast

iron spools to provide centre weight. Optional wheels can be provided for towing on roads. Available in 12, 14, 16, 18, 20 & 22 discs.

Leveller

The Leveller is a simple and rugged implement, which is directly fitted to the tractor.

Thresher

Thresher is available for different crops like Sunflow Paddy, Wheat, Soyabean, Multi crop, Groundnut etc. It come in different capacity ranging from 2.5 quintal/ to 15 quintal/ hrs. Thresher can be operated by electric motor, diesel engine or tractor PTO Shaft. Thresher for threshing small bundle cereals crops for research station is also available.

Spring Loaded Cultivator

It is used for weeding & interculture operation in field crop. It is available in 7, 9, 11 & 13 lines.

Maize Sheller

It is used for shelling Maize from cobs. It can be tractor PTO or electric motor or diesel engines driven. It is available in different capacities viz:
(A) 300 - 500 kg/hr
(B) 1.0 - 1.2 tph
(C) 1.5 - 2 tph

Maize Planter

It is used for sowing Maize on ridges as well on plain fields. It is available in 6, 5, 4, 3 & 2 Rows. Row to row & plant to plant distance is adjustable. In this the fertilizer metering is agitator sliding or orifice type and for seed vertical rotary disc drops the seeds in delivery tubes.

Baling Machine

It is used for making Bales of 50 to 70 kg weight. The dimension of Bale is approx. 42" X 26". It is operated with tractor PTO Shaft.

Post Hole Diggers

Post Hole Digger is an implement that will drill/dig holes of varied sizes and depths for planting seedlings and saplings. Post Hole Digger is an attachment to the tractor 3 point linkage with category I & II mountings. Auger driven through bevel gears by the tractor.

Diggers

Diggers are used for digging potato or groundnut. It operated by tractor PTO Shaft in 2 rows. Blade is used for cutting the soil. Shaker/ Conveyor is provided to separate mud from Potato/Groundnut plant.

Founded in 1984, Osaw Agro Industries Pvt. Ltd. is situated in Ambala Cantt, Haryana which is renowned as the agriculture hub in INDIA. Agrosaw is also engaged in the supplying of pre and post harvest implements like Disc plough, Disc Harrow, Thresher, Rotavator, Cultivator etc. It seeks to provide the farmers with a complete farming solution. We have a state of the art manufacturing facility. Our manufacturing facilities are equipped with latest machines like CNC Turret Punch, NC Shearing Machine, CNC Press Brake, Shaft Grinding Machine, Nibbling Machine, Lathe Machine, Universal Milling Machine, etc to keep pace with changing technology and requirement. Our products have been widely appreciated by our clients from countries like UK, Italy, Germany, Australia, Iraq, Turkey, Afghanistan, Srilanka, Ethiopia, Sudan and many more. Our team of trained professionals provides assistance in operations and maintenance of machinery.

Our Mission

To assist the client in simplifying work processes & ensuring better quality yields and results.
To provide customised solutions.

Our Objectives

To evolve a strategy for propelling Indian Agriculture on a high growth trajectory.
To create knowledge farmers in the country by bringing technology to their doorstep.
To promote opportunities for development, knowledge creation and Market access amongst all the players in the Agriculture Sector.
Create Value-added markets for the farmer's produce.
Create a global vision of Indian Agriculture.
Create and develop and train a knowledge based agricultural work force in the country.

Some of other Equipment

Zero till seed cum fertilizer drill
Strip till seed drill
Ground decorticator
Seed extracting machine
Subsoiler single & double bottom
Sprayer & duster
Winnowing Fan
Grass Shredder/ Shrub Master
Fodder harvester cum chopper machine
Tractor mounted bund former
One main chain saw
Tractor Drawn-Ridger
